The processes of Liberalization, Privatization and Globalization (LPG), along with technological revolution have strengthened the significance of a knowledge based society. Higher education and its effectiveness are universal issues which have a bearing on the development or under development of a country. Therefore, the educational system that produces this universal product of higher education assumes considerable significance. The demand for highly skilled workers is increasing, especially in the context of globalization, leading to better employment opportunities and enhanced wages for the university graduates.
